Saturday  
10-14h

Any variations to the regulated components that are applicable and new ones that may appear, shall be transferred to the customer both upwards and downwards. Any other charges made by the distribution company such as reactive energy, lease of metering equipment, rights, etc. shall also be transferred to the customer.

Likewise, the power terms and power units may be updated on 1 January each year, in accordance with the real value of the CPI (Last General Inter-Annual National Consumer Price Index published officially at the time of the update).

Times: Tempo times shall be from Monday to Friday from 10-14h and from 17-20h and Saturdays from 10-14h.

Hourly consumption: To bill the energy, the consumption made will be used as indicated by the distributor according to the hourly load curve. If at the time of billing there is no such hourly consumption, the consumption will be distributed hour by hour in accordance with the "Pa" profile published by Red Eléctrica de España ([www.ree.es](http://www.ree.es)). You can check the load curve applied to each invoice at [www.endesaclientes.com](http://www.endesaclientes.com).

This offer requires telemanagement measurement equipment with hourly consumption.

For billing on paper, the periodicity will be bimonthly. For electronic invoicing the customer can choose between monthly and bimonthly (by default monthly, unless the supply was already in Endesa, in which case the previous periodicity will be respected). The periodicity will always be monthly for invoicing by maximeter.
